Muhammad Hassaan Ahmad

FA24-BCS-070

Assignment 1 — Your Personal CV Page

Difficulty: Foundational · Covers: Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · Folder: assignment-1/

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An “About Me” section.
- An “Education” section listing your academic history in a semantic list or table.
- A “Skills” section.
- A “Contact” section with a real <a href="mailto:..."> link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — <header>, <nav>, <main>, <section>, <article>, <footer> as appropriate, not a page built entirely out of unstyled s.
- Styling entirely in a separate styles.css file (external stylesheet, not inline style="" attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.

Deliverables in assignment-1/: index.html, styles.css, any images, and your completion PDF.

CODE:

index.html:

```
<!doctype html>
<html lang="en">
 <head>
  <meta charset="UTF-8" />
  <meta name="viewport" content="width=device-width, initial-scale=1.0" />
  <title>Resume - Muhammad Hassaan Ahmad</title>
  <link rel="stylesheet" href="styles.css" />
 </head>
 <body>
  <div class="resume-container">
   <header class="resume-header">
    <div class="header-content">
     <img
      src="images/profilepic.png"
      alt="Profile photo of Muhammad Hassaan Ahmad"
      class="profile-photo"
     />
     <div class="header-text">

EDUCATION

BS in Computer Science

University / College Name

2024 – 2028 (Expected)

- Web Technologies
- Data Structures & Algorithms
- Database Systems
- Artificial Intelligence

TECHNICAL SKILLS

HTML5 / CSS3 | Python | Java | C++ | JavaScript | SQL / Databases | Git & GitHub

ABOUT ME

Undergraduate Computer Science student focused on artificial intelligence, machine learning, and distributed software systems. Experienced in end-to-end data pipeline engineering, relational database design, and real-time backend architectures. Passionate about applying algorithmic rigor and clean code practices to deliver scalable technical solutions.

EXPERIENCE

Data Science Intern

July 2026 – Aug 2026

Decodelabs

- Engineered clean, production-ready datasets through exploratory analysis, outlier treatment, and feature preprocessing.
- Built leak-free supervised fraud detection pipelines using SMOTE, Logistic Regression, and Random Forest models on 284k+ transactions.
- Evaluated models via Precision, Recall, and ROC-AUC rather than raw accuracy, maintaining a documented, version-controlled GitHub portfolio.

PROJECTS

Inventory Expert System

June 2026

Tech Stack: Python, Streamlit, Forward-Chaining Inference

- Developed an interactive web dashboard using Streamlit to monitor inventory levels, reorder thresholds, and stock anomalies.
- Implemented a forward-chaining inference engine with prioritized rule evaluation to automate decision-making and restocking alerts.
- Designed an intuitive UI allowing non-technical users to query system rules and inspect automated recommendations dynamically.

E-Commerce & Sales Relational Database System

May 2026

Tech Stack: Microsoft SQL Server, T-SQL, Relational Schema Design

- Architected normalized (3NF) relational database schemas covering product catalogs, customer profiles, order fulfillment, and sales tracking.
- Developed optimized stored procedures, complex multi-table joins, and parameterized queries to handle concurrent transactional workloads.
- Engineered custom DML triggers and database constraints to enforce business rules, audit inventory changes, and preserve data integrity.
- Created indexed database views and implemented role-based permissions for secure and efficient reporting.
